

5 STEPS

To Save Money, Be Comfortable & Reduce Pollution

1. Think about your current situation

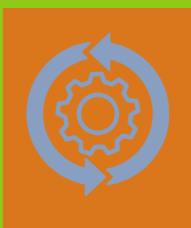

Have you noticed drafts in cold weather, AC and fans not keeping up in hot weather, or your energy bills going up? If so, it's time to take action to make your home more comfortable all year round! **Go to Step 2.**

Middletown

2. Sign up for Home Energy SolutionsSM

Scan or call 203-294-9677 to schedule your assessment and service, a \$40 copay applies. Customers who meet income eligibility requirements receive the initial visit at no cost and may qualify for additional offerings through Home Energy Solutions – Income Eligible.

3. Receive services & advice at assessment

Usually completed in 2 visits, approximately a \$1,000 value. First visit: Energy assessment is completed. Second visit: May include air sealing and other energy upgrades. Participating customers save an average of \$70-\$100 on annual energy bills, **even more** with Step 4.

4. Keep it going to save even more

During the "kitchen table wrap-up", technicians will recommend next steps specific to your home to help you save more money, like insulation, upgraded heating and cooling, water heating, windows and appliances. They'll leave you with resources, rebates and financing, payback and investment information.

5. Tell friends about your savings

Getting more energy efficient has compounded benefits for our community. With more weatherized homes, we can save money AND reduce local pollution that is bad for our health.
